

Aerial target quad "PARM"
Target drones for heavy machine guns, anti-aircraft cannons and air defence missiles.

Parameters

Size: 36x36cm (14x14")

Flight time: 15-20 min (depending on battery used)

Radio range: 400-800m (450-875 yards) depending on the landscape

Ground control: Android / Win / iOS tablet, phone or computer and Q-Ground Control software

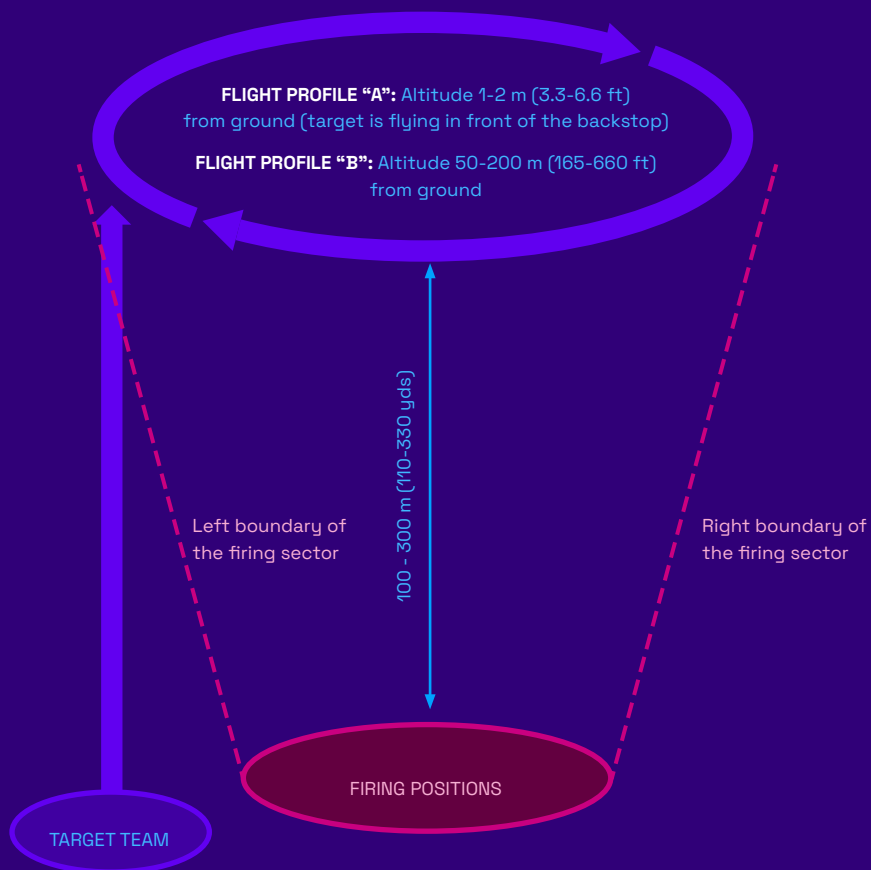

Remote (joystick) and **ground-control setups** remains the same throughout the practise shootings: all target drones can be binded with the same remote.

Purpose built as aerial target: bright colour, easy to operate, affordable in price.

The set normally comes with 5 or 10 drones, charging stations for 10 batteries, 1 remote, 1 tablet.
